Scrum.org Professional Scrum with User Experience Course

About this course

From flexible planning to faster time to market and higher-quality products, Scrum can help teams conquer a wildly fluctuating marketplace. But reconciling the User Experience (UX) with Scrum fundamentals is challenging. What's the best way to collaborate with UX specialists? How do you ensure customer feedback is included in Scrum events and decision-making?

In this hands-on training, Insight's Digital Innovation team will guide you through your biggest challenges with UX and Scrum. You'll uncover effective ways to work in Scrum teams, practical tools to work with customer feedback, UX techniques that integrate seamlessly with Scrum, how to handle design work that may extend beyond a single Sprint and more.

Who should attend

Scrum Masters, Product Owners and anyone involved in delivering products will benefit from this workshop. This includes roles such as engineers, product managers and developers.

Course topics

Participants will tap into new insights about UX and Scrum through the following topics:

- Enhancing continuous learning through Scrum with UX
- Framing work as problems to solve
- Prioritizing outcomes over outputs
- Effectively managing UX work in Scrum
- Experimenting for success

Course schedule
