Scrum.org Professional Scrum Developer Course

What to expect

Professional Scrum Developer™ (PSD) is an immersive three-day course where students act as an entire Scrum team that concurrently works on requirements engineering, design, development, testing, integration and deployment within a single iteration. Agile engineering practices and supportive Application Lifecycle Management (ALM) tools are explored as ways to improve a team's capabilities.

Students work in self-organizing teams, collaborating during series of Sprints to turn requirements into high-quality, potentially shippable software. They'll apply modern engineering practices and use the Scrum framework to cope with changes, develop from a realistic Product Backlog and gain a real-world view of what it's like to build software in Increments with Scrum.

Who should attend

The PSD course is intended for all members of a Scrum Development Team: architects, programmers, database developers, testers and others with some technical knowledge.

Prerequisites

Attendees will benefit the most from this course if they:
- Have studied the Scrum Guide (required)
- Have taken the Scrum Open and Scrum Developer Open (free online assessment)
- Have taken the Professional Scrum Foundations course
- Have experience or exposure to a Scrum Team
- Have been on or closely involved with a project that builds or enhances a product

Course schedule

Visit **insight.com/events** to find an upcoming PSD course in a city near you.

Trainers

Insight is recognized as a member of the Scrum.org Professional Training Network. This means we align with the Scrum values, have Scrum.org trainers who teach a qualifying number of Scrum.org Professional Scrum classes, and are committed to improving the profession of software delivery in part by providing Scrum.org training.

Assessment and certification

Upon course completion, attendees have the opportunity to take an online assessment of their skills and earn their PSD certification.
